

To whom it may concern at the FCC,

I want to take a moment to comment on the usefulness of the KLOVE radio station in Casper Wyoming. I live in a sparsely populated area in Wyoming. KLOVE provides me with a sense of connection with the rest of the United States. It also provides a connection with others in my community who also listen to KLOVE.

KLOVE provides a service to Casper Wyoming that a Low Power FM station could not provide. It enables me to connect with others outside Casper who think and believe the same as I do. This gives me confidence to make Casper a better place to live. Casper Wyoming needs KLOVE radio. Its positive message and effect on my community make this a better place to raise my family. A LPFM Broadcaster could not, and should not be allowed, to replace KLOVE radio in Wyoming.

Thank you for your consideration of me, my family and my community (Casper, WY and its surrounding areas); we appreciate what KLOVE does for us and support it financially as well.

Thank you again,  
David A. Bowman
